Hi Katrina,

Sorry for the delay in getting back to you on the data progress. I just spoke with Mark and explained to him that the Gold King Mine ER has pulled several of our resources who were currently working on the data evaluation.

Our goal is to get back to work on reviewing and loading the data and ensure that we have received everything from the labs as the first priority, which we will attempt to have completed by the end of this week. Once we are certain that we have received all of the data, we will then be able to begin to generate tables for your review along with the figures showing where any exceedances might have been.

We will get these tables for you as soon as we can, our goal is by the end of next week to have the first round of draft tables completed for review.

Thanks,  
Patrick

Hey Team, what is the status of the maps and data review?

thanks

Mark,

We are currently working on loading the data and confirming that we have all of the data. It should be mid-week when we will have data tables ready.

Derrick,

All sample results should've been submitted from the lab. How soon can you guys have a preliminary report/data tables completed?
